

◆ **TBC Copilot**

Tender, Bid and Contract Document Intelligence

Organize evidence, apply review rules, and surface document risks.

PRODUCT OVERVIEW

TBC Copilot supports tender preparation, bid evaluation, and contract review for complex engineering procurement. It combines document parsing, configurable review rules, source-linked risk identification, version comparison, and cross-role collaboration in one connected workflow. Procurement, technical, commercial, legal, and audit teams work from shared evidence while retaining accountable decisions and approvals.

Connect procurement, technical, commercial, legal and audit roles through a shared review framework.

CORE CAPABILITIES

01

Document Intelligence

Parse documents, tables and attachments while extracting important fields and source references.

02

Rules and Playbooks

Turn internal procedures, templates and review requirements into reusable, traceable controls.

03

Cross-Stage Review

Connect tender preparation, bid comparison and contract review while preserving versions and evidence.

HOW IT WORKS

01 PARSE

Structure documents, tables, attachments and relevant source evidence.

02 APPLY

Apply approved templates, rules, and playbooks to each document set.

03 COMPARE

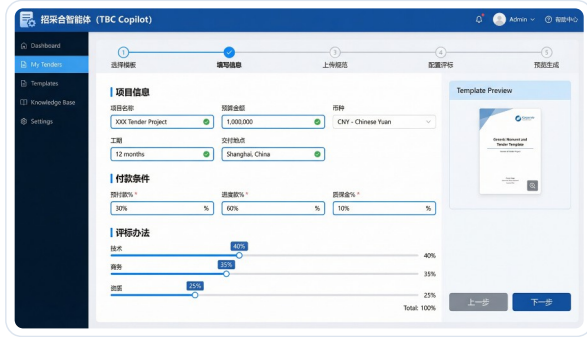

Locate deviations, conflicts and changes across submissions and versions.

04 RESOLVE

Assign findings for expert review, clarification and recorded disposition.

Application Scenarios

Cross-stage workflows for tender preparation, bid comparison and contract traceability.

01

Tender Preparation and Pre-Review

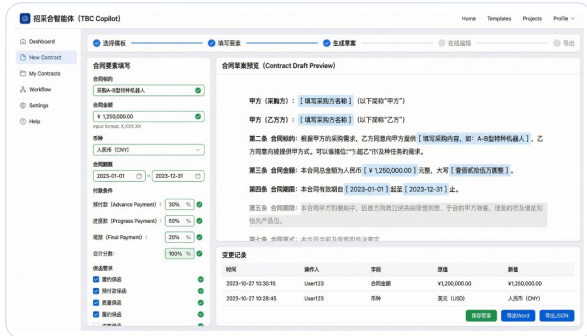

Use approved templates, clauses, and review rules to organize tender drafts, identify missing content, and surface conflicts or risks before the release version is finalized.

02

Bid Analysis and Comparison

Summarize supplier fields, deviations, commercial and technical differences, source evidence and items requiring clarification, giving reviewers a structured basis for comparison and judgment.

03

Contract Review and Traceability

Check important clauses, attachments and historical versions for consistency, retain evidence-linked findings and comments, and support traceable review from contract drafting through revision and approval.

CUSTOMER VALUE

Consistent Review Criteria

Turn internal requirements and specialist experience into reusable rules and approved templates.

Earlier Risk Visibility

Highlight important omissions, conflicts and deviations before documents move to the next stage.

Collaborative and Traceable Review

Let procurement, technical, commercial, legal and audit roles work from shared evidence and versions.

Connect evidence, rules, and accountable review across tender, bid, and contract workflows.
